Henderson Storage Systems

# Original Rotary Die Storage

Half-Height Unit adds on to Original Unit

Rotary cutting dies are stored easily and efficiently in the Original Henderson storage rack. Dies are nested for maximum die storage in a minimum of space, and are safely kept and securely centered with our exclusive "lip" slide design. Plus our die location system, using Henderson labels, makes retrieval fast and easy.

Original Rotary Die Storage rack systems are 80" high x 80" deep, with different widths to accommodate different die diameters. Original racks are also available in half-heights and half depth configurations (see chart below).

Each Original Rotary Die Storage rack accommodates up to 16 cutting dies in the sizes outlined in the charts below. While only six common die sizes are shown, racks can be manufactured by our factory to fit any size die requirement.

Henderson's exclusive "lip" slide design keeps rotary cutting dies securely centered, preventing damage to the cutting and scoring knives. Numbered racks refer stored dies to customer files or jobs for easy access.

Machine Circumference	Wood I.D. Size (approx.)	"Original" Unit 80"D x 80"H Capacity	Half Height Unit 80"D x 45"H Capacity	Half Depth Unit 40"D x 80"H Capacity
66"	19-3/16"	12 dies	6 dies	12 dies
50" *	14", 14-1/4", 14-1/2"	14 dies	7 dies	14 dies
38"	10-5/8"	16 dies	8 dies	16 dies
37-1/2"	10-1/8"	16 dies	8 dies	16 dies
35"	9-1/2"	16 dies	8 dies	16 dies
24"	7"	16 dies	8 dies	16 dies

\* Please specify wood I.D. on 50" Rotary.

This 66" rack has more space between dies to accommodate taller rubber.	Capacity	Spacing
66" cylinder	84" h x 80" d	12 dies
		6-1/4"

**Die Transportation Cart for Original Rotary Racks** features heavy-duty construction and allows for the transfer of six 66" dies. The cart measures 48" long by 54-1/2" high, and comes in a variety of widths to accommodate different diameters. Each cart has a 500 lb. load capacity and sturdy 3/4" plywood shelving at top and bottom so that smaller dies as well as other materials can be transported at the same time. An "XL" cart is also available for 66" dies - 54-1/2" high x 80" deep and has 6 wheels, 4 swivel and 2 stationary (XL-Cart not pictured).

# DRO & EVOL Rotary Die Storage

Wagner can supply specialized **Henderson Storage Systems** for just about any type of die, including **DRO and EVOL rotary dies**. These heavy-duty units are designed to be sturdy, durable and versatile. Transfer carts are also available. Wagner also has a full line of **DRO Posilock Hoops** (inset) in several sizes, available in both single and double groove design.

## DRO Rotary Die Storage

DRO Machine Rotary Die Storage Unit by Henderson.

Henderson Storage Systems

# Platen & Bobst Die Storage

Henderson Bobst & Platen Die Storage System's adjustable racks allow for the safe, efficient storage of hundreds of dies, regardless of size and weight.

By using an inverted "T" and double "L" design, Platen and Bobst dies are securely stored hanging on 2 pins. Position the beams based on your most common sized dies, and you will maximize the number of dies stored on each rack.

Both Platen and Bobst storage sections can be combined on a single rack, and a label locator system makes die retrieval quick and easy.

Platen die storage racks store up to 177 dies, and the Bobst racks up to 90 dies. Standard units are 12' high (different frame heights are available), 10' long and 48" or 60" deep. 5,000 lbs. can be carried on the lower (5") channel beams, 6' from the floor. While the 2 upper (4") channel beams can each hold up to 2,500 lbs.

Each storage system is designed for maximum support, constructed of heavy gauge steel and triple-welded for superior strength and durability. They are easy to assemble using the heavy duty hardware that's provided with each unit.

A close-up view of the "T" configuration of rack slides used on Platen storage systems. Dies slide between the channels supported by the two pins.

The twin "L" configuration of the Bobst storage rack. Bobst dies slide into the rack between the twin "L's" supported by the two pins.

## Henderson Storage Systems

### Platen & Bobst Die Storage (continued)...

**Support Pins** are available in 3/16" diameter by 1-5/8" in length. To install support pins, drill 13/64" dia. holes 7/16" from top edge of wood, on-center near the front and rear of the die. Pins are available in packs of 100.

**Platen and Bobst Die Transportation Carts** feature heavy duty construction, and are 48" long, 62" high and 27" wide. They feature a 3/4" plywood top and bottom so that smaller dies and other materials can be transported at the same time. The Platen version can transport up to 11 cutting dies, while the Bobst cart moves 3 sets of dies and stripping boards.

**EasiBlank™ Hangers** allow completed EasiBlank tooling to be stored in Henderson Storage Systems for Platen dies, and transported in Henderson Transportation Carts for platen dies. Hanging brackets include thumb screws for easy and secure installation. Hangers come in sets of 2, one for the front and one for the rear of the blanker.

## Offset Litho Plate Storage

Offset plates hang by "S" hooks (overall length: 2-7/8"). Hanging holes on "T" storage bar are factory-drilled.

**Henderson Litho Plate Storage** systems provide an intelligent storage solution, and protect your plates as well. The patented sliding "T" bar and "S" hooks make transporting plates to the press easy, and slide into the storage rack effortlessly. Each rack is 12' high, 10' long and 48" or 60" deep, allowing for the hanging of multiple plates on each slide.

Henderson Litho Plate Storage System - U.S. Patent # 4,907,706

**Litho Plate Transportation Cart** can transport up to 11 multiple sets of litho plates. 48" long, 62" high and 27" wide, the cart uses the same "S" hook and sliding "T" bar design as the storage rack.

**Henderson Storage Systems**

# Mounted & Unmounted Printing Plate Storage

Henderson Printing Plate Storage systems, for mounted and unmounted plates, can efficiently store approximately 560 plates of varying shapes and sizes. Constructed of heavy gauge steel, these systems are designed to be tough and durable.

Plates hang on "S" hooks with a special 90° offset which can be ordered in two different sizes to accommodate various plates. Henderson labels, provide for an easy to use retrieval system.

Easy to assemble, Henderson Printing Plate Storage Systems are an effective storage solution for mounted and unmounted printing plates.

Unit dimensions: 48"D x 12'L x 14'H.

Mounted and unmounted printing plates hang on special "S" hooks, which are available in two sizes: Small - 4-7/8" overall length, Large - 7-1/4" overall length. Hooks are available in quantities of 100 per size.

**Mounted & Unmounted Printing Plate Transportation Cart** features heavy-duty construction and carries up to 48 plates. 52" long, 86" high and 32" wide, the carts have a lower shelf to transport ink or other materials.

*Henderson Storage Systems*

# Ink Storage Unit

The **Henderson Ink Storage** unit is specifically engineered to store 5-gallon ink pails, safely and efficiently. This patented rack can hold up to 108 5-gallon pails, and afford convenient access from the front and back on all three levels.

Our Ink Storage unit is designed to provide maximum support, constructed of the same quality, heavy-gauge steel used in our Die and Plate Storage Systems.

Easy to assemble, the unit comes with a turnbuckle tensioning device that keeps the shelves properly aligned and stable.
