

# Phenolic Material, Pins and Rings

Wagner carries everything needed for fast, reliable makeready.

## ◀ Counterplate Pins and Rings

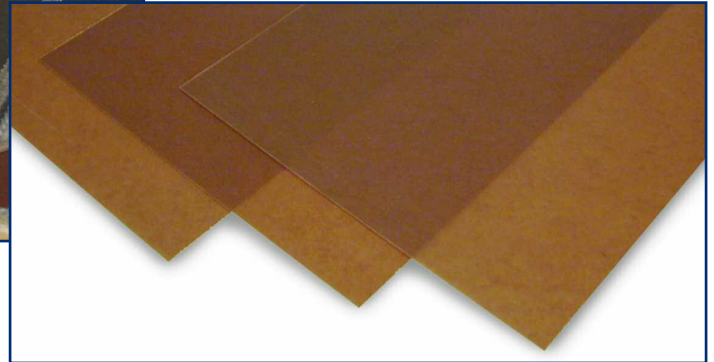

Wagner Counterplate Pins and Rings are designed for pre-made counters and used as locators to transfer counters from cutting die to cutting plate for exact registration. Pins are available in machined aluminum, and molded plastic. Plastic pins are available in black, white and clear purple. Spacers are waterjet cut from vulcan rubber.

## ▶ Phenolic counter material

Available from Wagner in either rigid or flexible styles.

Can be machine routed or water jet cut to create a

durable and reusable counter for long runs. Phenolic sheets are available in thicknesses from .017" to .049" (.04mm to 1.24 mm) and in sheets that measure 1 meter x 1 meter (39" x 39"), some thicknesses 42" x 42" (1070mm x 1070mm). Contact your Wagner location for available thicknesses and sheet dimensions.

## ▶ Wagner Thin Plates for faster Makeready!

The Wagner Thin-Plate system provides a series of replaceable cutting plates, with a range of hardnesses; soft, medium and hard, to reflect specific diecutting applications.

Wagner Thin-Plates allow for a faster press changeover and more predictable makeready, getting you closer to 100% cut and crease of the board in a fraction of the time compared to traditional counters.

**Standard 1mm Thin Plates Available for All Major Press Models!**

**1.1mm - 1.5mm units also available!**

## ▶ Creasing Matrix and tools are also available from Wagner Die Supply, contact us or visit
